

Street Sign Survey

Give the following either a 1 or 2, 2 being better than a 1.

Check the following:

Intersection or site description	Entry into Neighborhood?	Intersection?	High visibility/high traffic?	If want more, Extra Spot?	facing?	Total points	Has Light?	Light suggested*	Needs Post or pole	Put on light pole	notes: (homes on right side of driver are best)
Morse/Bonita	2	2	2		W	6	x	x			
Morse/Fieldcrest	2	2	2		W	6	x	x			
Morse/Ben #1, Ben	2	2	2		W	6	x	x			
Morse/Ben #2, Morse	2	2	2		S	6	x	x			
Ashborne/Marconi	2	2	2		N	6		x			
Ashborne/Ellenmere	2	2	2		NW	6	x		x		
Ashborne/Fieldcrest	1	1	1		?	3	x			x	**Has faded sign. If put new, turn direction (N).
Ashborne/Bonita	1	1	1		?	3	x			x	**
Ashborne/Ben	1	2	2		SE	5	x			x	
Ellenmere/Rhonda	1	1	1		W	3	x			x	**
Ellenmere/Walton	1	1	1		W	3	x			x	**
Ellenmere/Stafford	1	2	2		SW	5	x			x	Nice visibility.
Ben/Watt	2	2	1		E	5			x		Could do double sided. So far I counted at 1 sign.
Ben/Walton	2	2	2		S	6	x			x	Has stop sign on light pole.
Walton/Chenu	2	2	2		S	6			x		Just out of neighborhood, but high visibility
Ben/Rhonda	1	2	1		SE?	4	x			x	
Morse/Marconi	2	1	1		?	4			x		
Frontage-Marconi near last home by businesses.	2	1	2		E	5	?				Visible to walkers/bicycles.
Marconi - home out front			2	2	?	4					

Could select just one for Ellenmere and Ashborne** so 2 instead of all 4 (or none of these due to low score).

Total, if do all 1 sided is 19 signs.

I estimate rounding up that each sign will cost about \$55. (County putting sign up or post is about \$15 either way. Sign costs about \$37.00, and rounding up for bolts and maybe a few other supplies I get about \$55.)

all: 19 X \$55 = \$1045

High totals/entry: 9X \$55 = 498

5 and above: 12X\$55=\$660

4 and above: 15X\$825

I think I might be underestimating cost for the post.....

* Has no light, but a light would be helpful. Just info collecting for this right now.
